# HEAVY FLUSHBY® RPSRX100

## The "Heavy" Flushby (RPSRX100)

The "Heavy" Flushby rig retains all the benefits of a typical Flushby with the added ability to handle tubing along with a higher hook load (100,000 lbs). This freestanding design allows operators the ability to rig up and down quickly and has the option of handling continuous rod with our new and improved X-450 X-Celerator®.

The "Heavy" Flushby has been designed to tackle both Conventional Rod and Continuous Rod. Compared to conventional service rigs the "Heavy" Flushby is much faster transitioning from running rods to running tubing.

The Joystick controlled Drawworks brings "Big Rig" fine control to this mobile service rig. With similar feedback devices control, safety and operator set points bring this rig to the forefront of the industry.

With all controls in one console the operator has a clear view of both the work floor and the catwalk while keeping in constant communication with the catwalk operator.

**Our experienced mechanical, hydraulic and electrical staff install commission and support your equipment 24 hours a day 365 days a year!**

**Contact us** today to experience service that is second to none!
